

Dipl.-Ing. Thomas Eschbacher  
Director

## To expand our team we are looking for a **Project Manager Sustainability and Building Physics (m/f/x)**

Location: Vienna

### Our offer

- The chance to play an active part in planning a sustainably designed environment
- Challenging assignments in an office with a team-based, interdisciplinary structure
- A permanent contract with long-term future prospects
- Opportunities for personal development and advancement within a global network
- Climate-friendly transport incentives (e.g. company bicycles and travel tickets)
- An office in an attractive location with excellent public transport links
- Contribution to the pension plan, sporting activities and several annual team events

### Your responsibilities

- Processing of energetically and architecturally demanding projects
- Holistic consulting on sustainability in various disciplines (ecology, energy, life cycle considerations, materials and building physics)
- Independent supervision and technical coordination of certification according to ÖGNI/DGNB and klimaaktiv
- Participation in the development of innovative and sustainable energy concepts
- Building physics calculations as well as simulations in the field of thermal insulation, energy balancing and acoustics

### Your profile

- You'll have successfully completed your studies in the field of civil engineering, architecture or similar
- You have several years of professional experience, ideally with a focus on sustainability and building physics
- You have experience in project management and in supervising project engineers
- You have experience in the application of certification systems, ideally as an approved ÖGNI/DGNB consultant/auditor
- You have good knowledge in the analysis/solving of building physics issues as well as in the corresponding building physics software
- You have knowledge of life cycle assessment and life cycle costs
- Your way of working is independent and reliable
- You have a very good command of German and English

Werner Sobek is internationally synonymous with engineering, design, and sustainability. Our company is home to more than 400 employees and is represented on several continents. Our work is renowned for exceptional design based on outstanding engineering and integral concepts that minimise the consumption of energy and materials.

We look forward to receiving your application along with an indication of your salary expectations and your preferred starting date. If you have any questions, please do not hesitate to get in touch.
