

Dipl.-Ing. Torsten Noack
Managing Director

To expand our team we are looking for **Structural Engineers (m/f/x)**

Location: Berlin

Our offer

- Challenging assignments in an office with a team-based structure
- Support from experienced colleagues/mentoring programme
- Well-founded onboarding/introduction
- A permanent contract with long-term future prospects
- Flexible working hours and performance-related pay
- Individual development and promotion opportunities
- Climate-friendly transport incentives (e.g. company bicycles and travel tickets)
- An office in an attractive location with excellent public transport links

Your responsibilities

- Reviewing structural engineering proofs
- Executing construction supervision
- Calculating and designing supporting structures and special constructions
- Close cooperation with other disciplines in our company
- Communicating with architects, clients and contractors
- Participating or organising project meetings and site visits
- Preparing static calculations for small and medium-sized construction projects

Your profile

- You'll have successfully completed your studies in civil engineering
- You're a team player who may or may not have professional experience
- You have strong powers of spatial visualization
- You're familiar with finite elements and CAD software
- You have a very good command of German and English, other language skills are an advantage
- You're ready to take on responsibility and play an active role

We are an experienced team of inspectors, structural engineers and project managers. Since 2020 our office has been part of the Werner Sobek company. Our range of services includes the preparation and testing of structural designs as well as expert opinions and technical advice and support in the entire field of structural engineering.

We look forward to receiving your application along with an indication of your salary expectations and your preferred starting date. If you have any questions, please do not hesitate to get in touch.
