Engineering Made in Frankfurt

Hello,

"Everyone dreams of helping to shape the Frankfurt skyline," enthuses Daniel Torakai, managing director of our Frankfurt office, in a short film about his team and their projects. Around 60 colleagues work at our office on the Main, developing innovative concepts for structures and facades – both for projects in Frankfurt and on a national and international scale as well.

That's reason enough to dedicate a newsletter to the team in the metropolis on the Main and the projects there!

Enjoy taking a look!

Roland Bechmann

Dipl.-Ing. Roland Bechmann
CEO and Partner of Werner Sobek AG

P.S.: If you have any questions or comments about this newsletter, please feel free to write to us at feedback@wernersobek.com. We look forward to hearing from you.

Art Déco meets Transparency

The glass panes for the new entrance area of the Messeturm explored the technical limits of what is possible & permissible.

Listed Building, Revitalised

The revitalisation of the former Commerzbank Tower, built in 1972, preserved the listed appearance of the facade.

FOUR: DGNB pilot "Vertical Cities"

Werner Sobek Frankfurt, in a joint venture with Bollinger + Grohmann, was responsible for the structural engineering of the four towers of the high-rise ensemble. A short film presents the project.

Sustainable Modernised Reconstruction

In addition to structural engineering and building physics, Werner Sobek was responsible for DGNB certification of the Junghof-Plaza project. The office building was almost completely deconstructed and rebuilt.

Hybrid Living on 16 Floors

One Forty West, also known as 'T-Rex', is a hybrid high-rise with a total height of 140 m in the Senckenberg district. The building was constructed using the solid construction method and is used as a hotel and residential building.

"I've got to go there!" A Film about Werner Sobek Frankfurt

In a short film well worth watching, Daniel Torakai, managing director of Werner Sobek Frankfurt, talks about his career and how he came to join Werner Sobek.

Film: one morning filmproduktion

Concept of an "urban City within a City"

The Brick 2.0 is an office building of Deutsche Bahn AG with a 66-metre-high tower. The project offers space for 3,000 of the company's employees. It develops the previously industrially used areas of the Europaviertel.

Resource-Efficient High-Rise

The KfW Westarkade building has been honoured with the CTBUH's "Best Tall Building Worldwide Award". The colour scheme of the facade panels reflects the colour components of the surrounding city and park landscape.
