## What Connects Art and Engineering?

Dear reader,

The planning of complex load-bearing structures and facades as well as the development of integral sustainability systems is part of our everyday work. The results are usually impressive. However, when an artistic commission is added to these tasks, very special projects are created... In this newsletter, we would therefore like to give you a brief insight into the area of "Art Engineering by Werner Sobek".

For many years, we have been supporting artists in the realisation of their works with our engineering advice. For over a decade, for example, we were able to support the Stuttgart artist rosalie in the realisation of her fantastic works. We planned the "Fallen Sky" sculpture in the USA for the up-and-coming artist Sarah Sze. And at the international open-air exhibition "Desert X" in Saudi Arabia, we worked with Zeinab AlHasehmi, Dana Awartani and Stephanie Deumer on their artistic contributions.

## rosalie & Werner Sobek

Born Gudrun Müller in Gemmringen in 1953, the artist rosalie passed away in 2017 at the age of 64. The collaboration with rosalie was always inspiring for us – we are proud to have made a contribution to the realisation of her fascinating works.
